

For our German subsidiary located in Dresden we are looking for a

Senior RA/QA Specialist (m/f)

Do you enjoy working in a dynamic team within a growing international company? Are you interested in cross-functional support for the development and manufacturing of new innovative non-invasive medical devices and would like to support our organisation with your excellent quality knowledge and potentially grow into a management role?

Your tasks could be:

- Act as RAQA interface for CMI customers
- Creation and supervision of product quality control inspections
- Product release
- Resolution of quality non-conformities with manufacturing and suppliers
- Oversight of Statistical Process Control
- Administration and enforcement of corrective and preventive actions system (CAPA)
- Management of customer complaints and related incident reporting
- Oversight of environmental control and cleanroom validations
- Conduct QMS trainings for all company staff
- Host audits of notified bodies and other regulators to CMI
- Perform internal audits and audits to suppliers of CMI
- Cross functional support to ensure compliance with ISO 13485, 21CFR820 and other regulatory requirements

We are looking for:

- Bachelor degree in a technical or lifescience area
- Excellent communication skills and fluent in English and good in German
- At least 3 years of professional experience, preferably in the medical device industry or other highly regulated industry;
- Familiarity with ISO 13485 and other quality standards;

Travel requirements:

- The majority of task would be performed on-site in Dresden with occasional travel to subsidiary facility, suppliers or customers throughout the world;
- Passenger cars driving license needed.

If you are interested in this challenging opportunity and meet the above criteria, then please send your *ENGLISH* application or refer further questions to jobs@contract-medical.com.
